

HELP FUND SCIENCE

by supporting the Entomological Foundation

Donations and other support to the Entomological Foundation helps us to fulfill our mission of providing the resources K-12 teachers need to get kids excited about insects. As an example, the Foundation supported the #BatesMosquito education project in Annapolis, MD in 2017-2018. The kids worked with science educators to develop a six-foot tall mosquito sculpture that was the center of a variety of biological, art, math, and ecological lessons. As one child said later, “I never knew mosquitoes could be so cool!”

With your help we can do more. We provide:

Grants for Educators:

The Entomological Foundation exists to develop the next generation of entomologists. Whatever your mission, whatever your vision, whatever your methods — if you want to get kids excited about insects by developing innovative programming in the classroom, we want to hear from you. And help you. The Entomological Foundation supports mini-grants for programs that teach kids about entomology. Funding opportunities are detailed on our website.

Awards for Entomology Educators:

The Entomological Foundation provides awards for K-12 Science, Technology, Education, Art, and Math (STEAM) educators who use insects in the classroom as a method for teaching science, math, art ... or any subject really. We simply believe that there is no better biological model for education than arthropods. Learn more about our awards program online.

The Entomological Foundation is closely aligned with the Entomological Society of America, the largest insect science organization in the world.

Learn more about who we are and what we do on our website and then apply to have your insect education project funded.
